## CARPE VITA EXPLORER, MALDIVES

Diving in the Maldives is among the world's best year-round — hard and soft corals, swim-throughs, myriad pelagics and, above all, manta rays and whale sharks.

The *Carpe Vita Explorer's* itineraries are designed to take advantage of the conditions and take divers to the best diving areas for different seasons. The Maldives also are known for unusual underwater topography encompassing outer and inner reefs, small coral pinnacles known as thila, caverns and walls. Divers will see the largest living fish species, the whale shark, plus colored flatworms, anemones, turtles and copious amounts of reef fish. Mantas can be seen throughout the year and whale sharks are seen almost monthly. The water

temperatures remain a toasty 82-86 degrees Fahrenheit (28-30 degrees Celsius) year-round. Carrying 20 guests and 14 crew, the *Carpe Vita Explorer* features 10 large, luxurious air-conditioned staterooms, all with private bathrooms and showers, on three decks; all can be configured to accommodate a couple or two singles. The top deck features the sundeck, offering both shaded and full-sun areas and a hot tub. The upper deck includes the alfresco dining area with ocean views, a bar, a small lounge area and the bridge. The main deck contains the air-conditioned salon, TV lounge and indoor dining area, galley, camera charging station and a large camera table. Four dives are conducted daily directly from a 61-foot (18.5 m) dhoni, which is fully equipped with a bathroom, hot-water showers and air and nitrox compressors.
